Well survey:

50 Ponderosa Trail
Rosman, NC 28772

A survey was don at 50 Ponderosa Trail, here are my findings.

Pictures from left to right The well is located next to the road in front of the house. the well was installed 9/17/1991 which produces 5 gal/min 7200 gal/day. Depth of the well 405 ft deep with the casing 130 ft. The well is in working condition and will supply enough water for the home. Pressure tank is located in a closet facing the front of the house. Have any questions please give me a call.
